

CASE STUDY

Oregon Zoo — ZooLights

CHALLENGE

Drive evening attendance during the slowest revenue months while maintaining the zoo's family-friendly identity and operating within a tight nonprofit budget.

APPROACH

A modular lighting program designed to grow over three seasons. Year-one investment in a hero walkway and signature animal lights; years two and three add adjacent zones using compatible hardware.

OUTCOME

47% increase in evening attendance during the program window. Year-three program ran with no new capital outlay. Press coverage in The Oregonian, KGW, and Travel + Leisure.
